For Products Good Enough To Eat Use A Gourmet Preserving Spoon

Our products are made with absolutely no preservatives – we mean NONE!

That's why we ask that you do not use your fingers to scoop out the product as to not introduce bacteria into the pure goodness. Just as you will not put your fingers in food you would like to preserve, try not to put your fingers in our cosmetics in order to extend its shelf life.

So, we crafted this beautiful, sustainably sourced, wooden gourmet spoon to help you scoop out the rawness BUT if you insist on being handsy – please stick the product in the fridge.
